

AIRCOURT

AirTrack Factory

A FUN BOOST

One of the most popular inflatables in trampoline parks and basketball facilities worldwide.

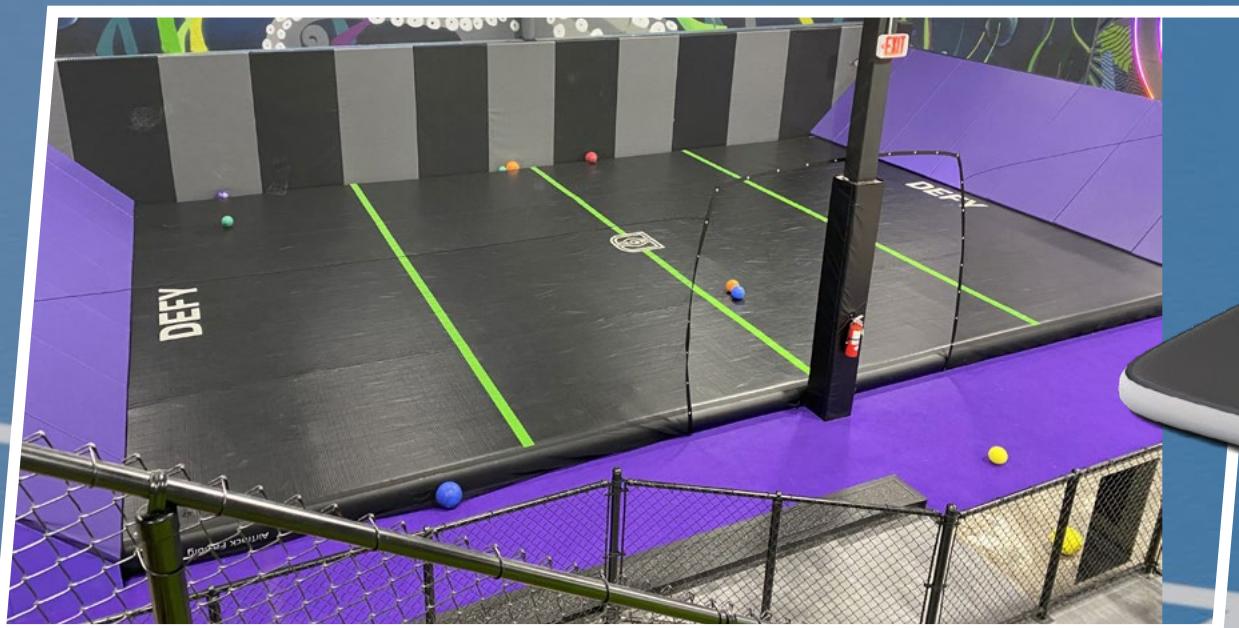

It brings a whole new dimension to play: suddenly everyone can dunk or reach the volleyball net, and those who already can get an extra boost to take it even higher.

From custom colors and sizes to sport lines, inflatable goals, and even full side boardings. Every setup can be tailored to your facility.

Designed to host large groups, the AirCourt instantly invites play. No explanation needed. People just jump in and start competing, laughing, and flying.

- ✓ **Perfect for large groups**
- ✓ **Provides boost to jumps**
- ✓ **Custom design options**
- ✓ **Our most popular attraction**
- ✓ **Cost efficient**
- ✓ **Fun!**

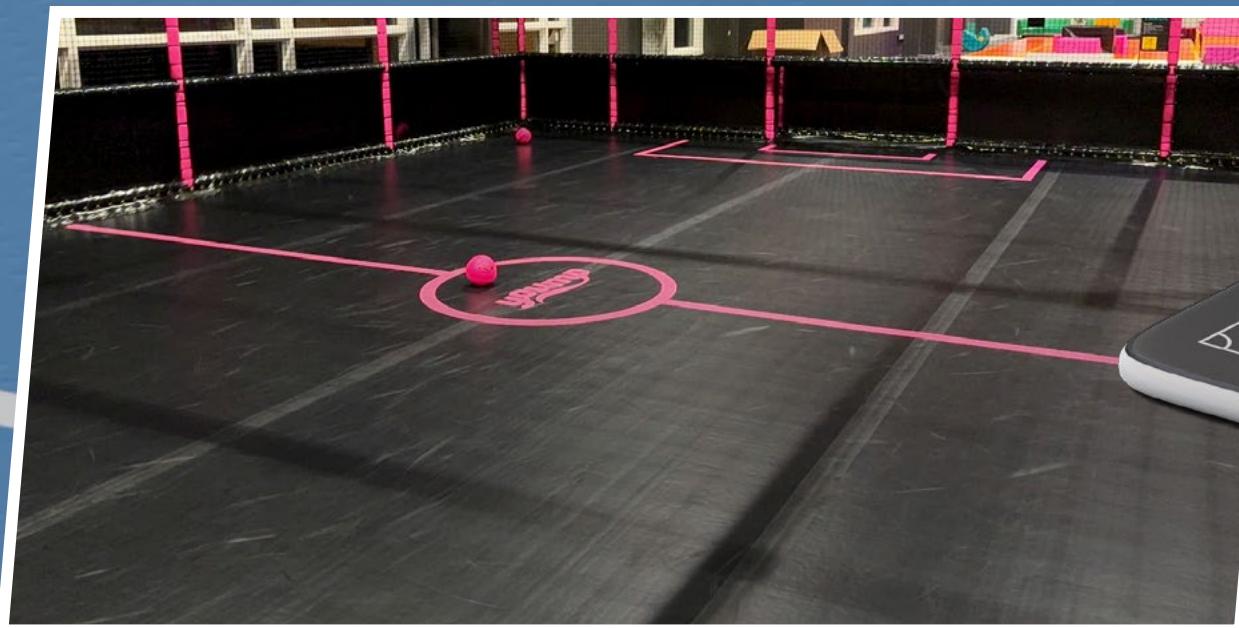

DODGEBALL

Dodgeball is a popular sport in trampoline parks and the rules are universally known. This setup is often used for volleyball as well.

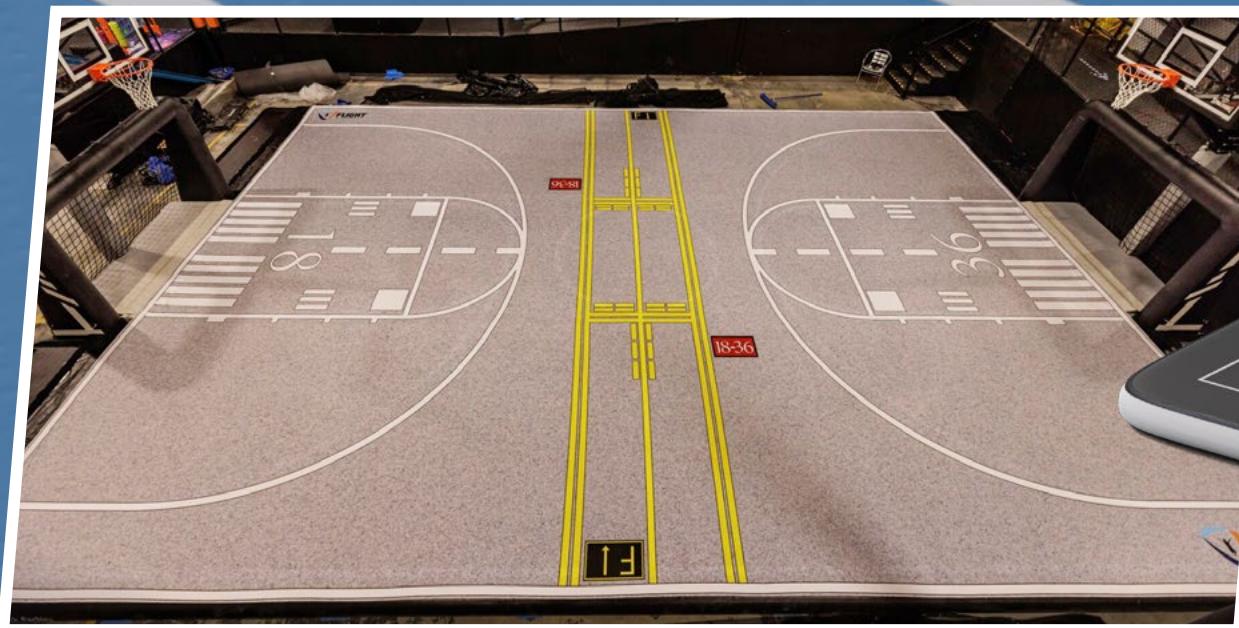

BASKETBALL

Basketball is the most popular option. The boost offers athletes the ability to dunk. The AirCourt transforms the game of basketball into an even more spectacular version of this already spectacular sport!

SOCCER

Regular soccer or bubble soccer are one of the most fun, especially for locations in Europe. It's not without reason that most kids ask their p.e. teachers to play soccer all the time!

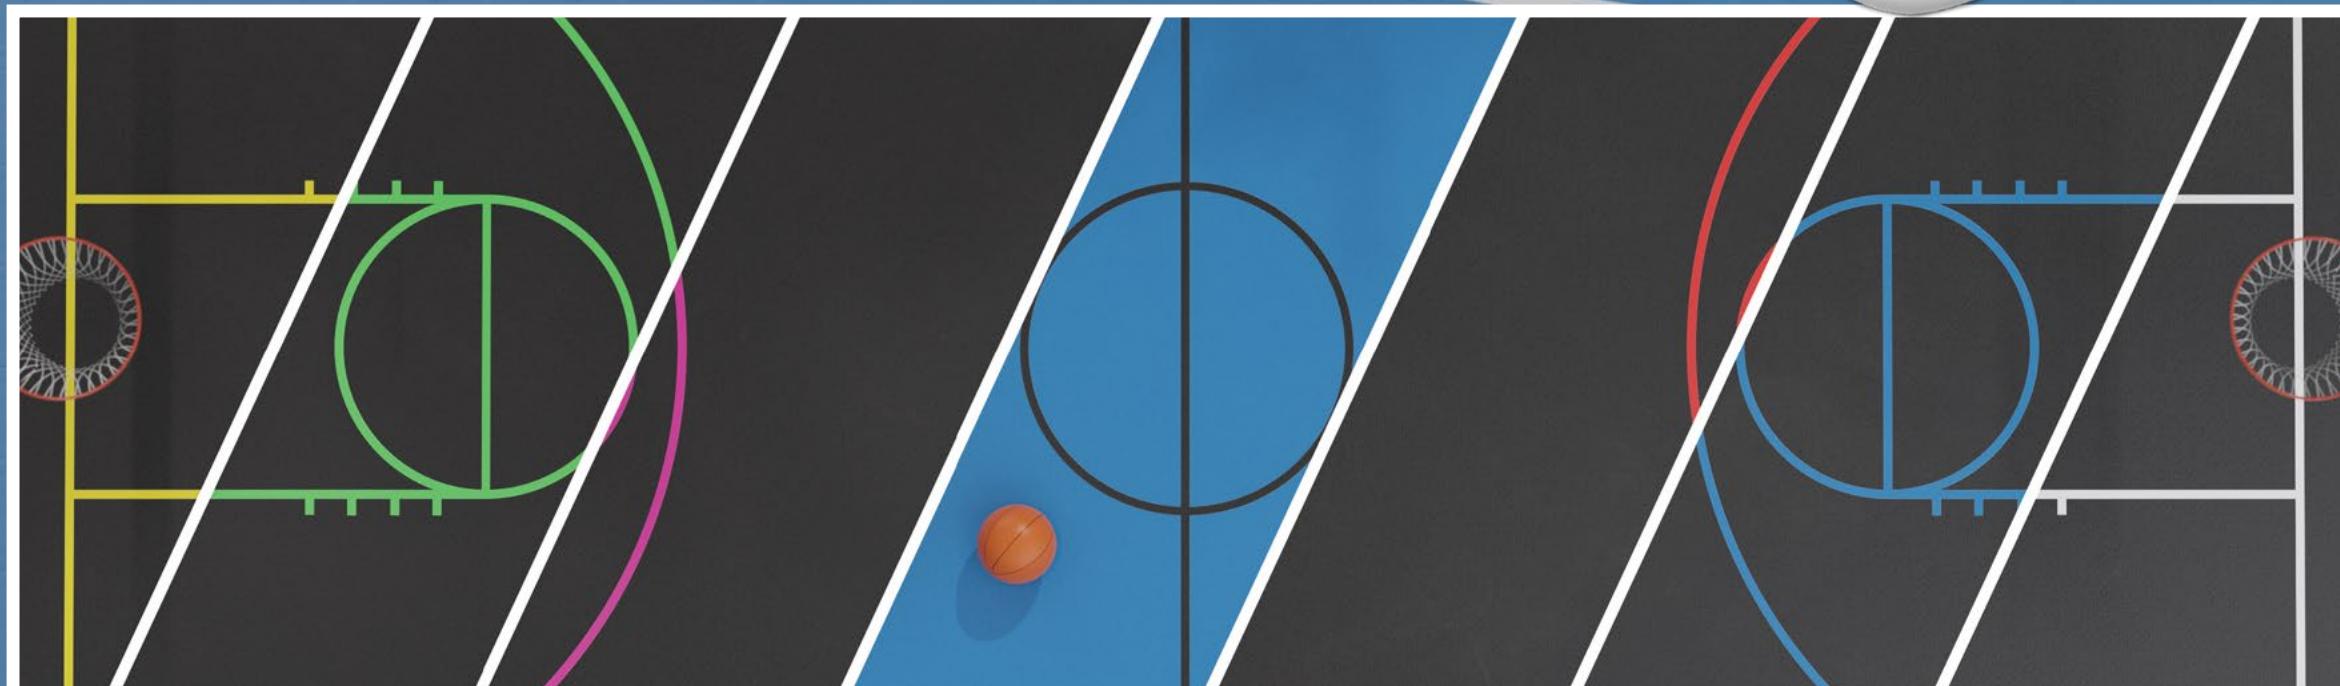

MULTISPORTS

Can't make a choice? Then just pick all of them!

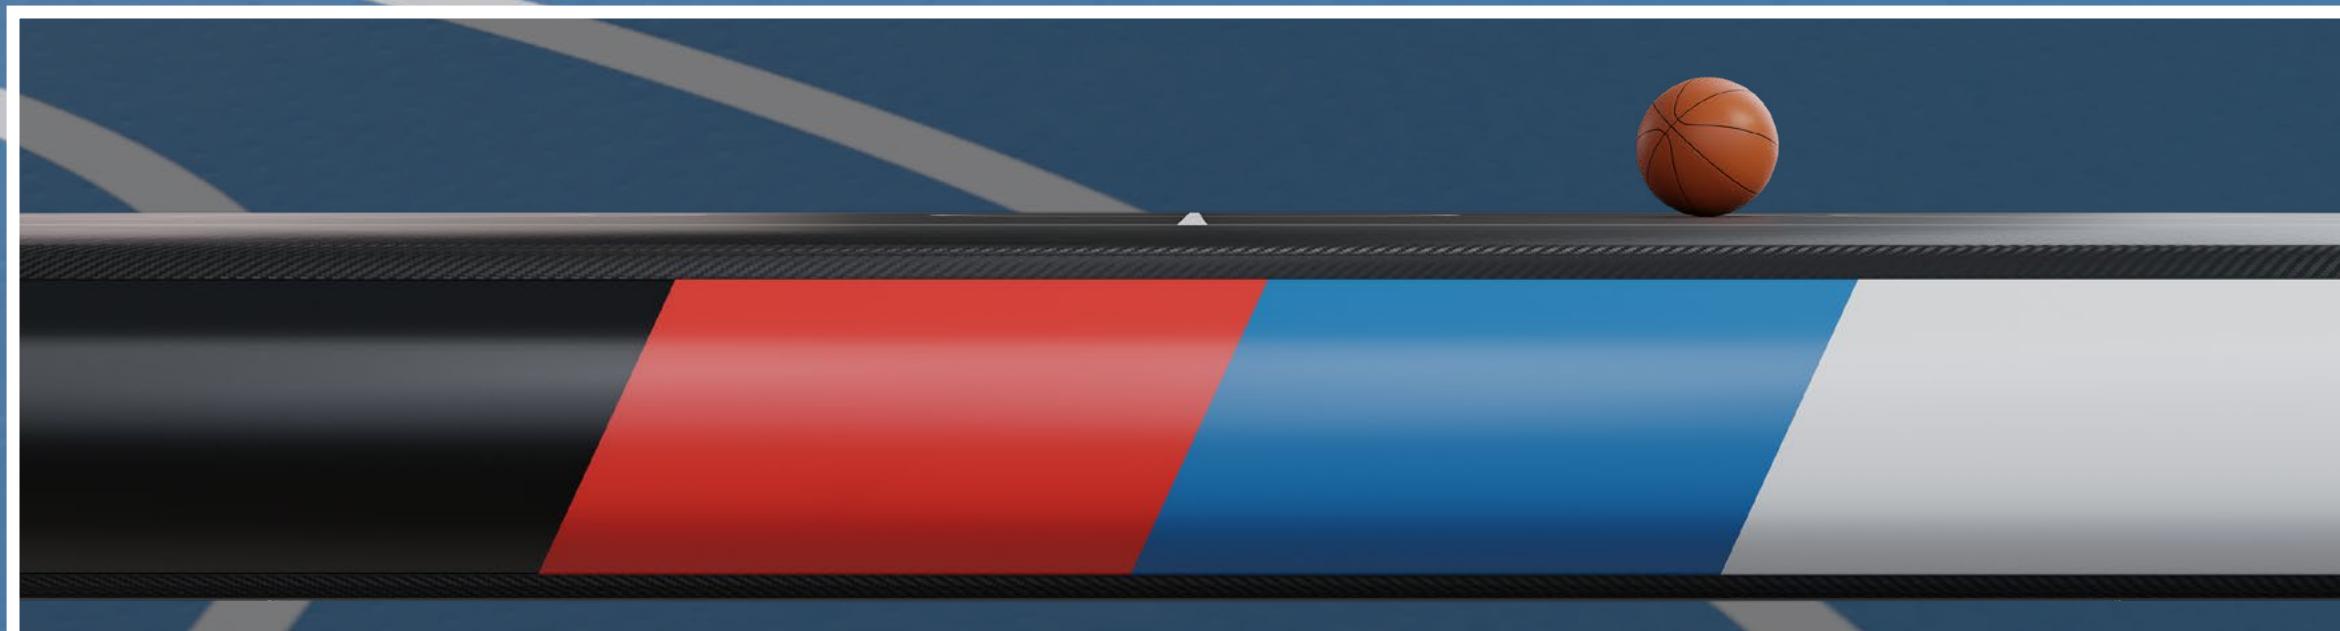

BASE COLOR

Sleek black or bright blue. Another option is to go for a full-color topsheet to really make your branding stand out. The bright colored sheets can be printed in any design and can even wrap around the sides of your custom AirCourt!

LINE COLOR

Choose the lines and design. Basketball, soccer, volleyball or a multi-court? We custom-make each AirCourt to your standards.

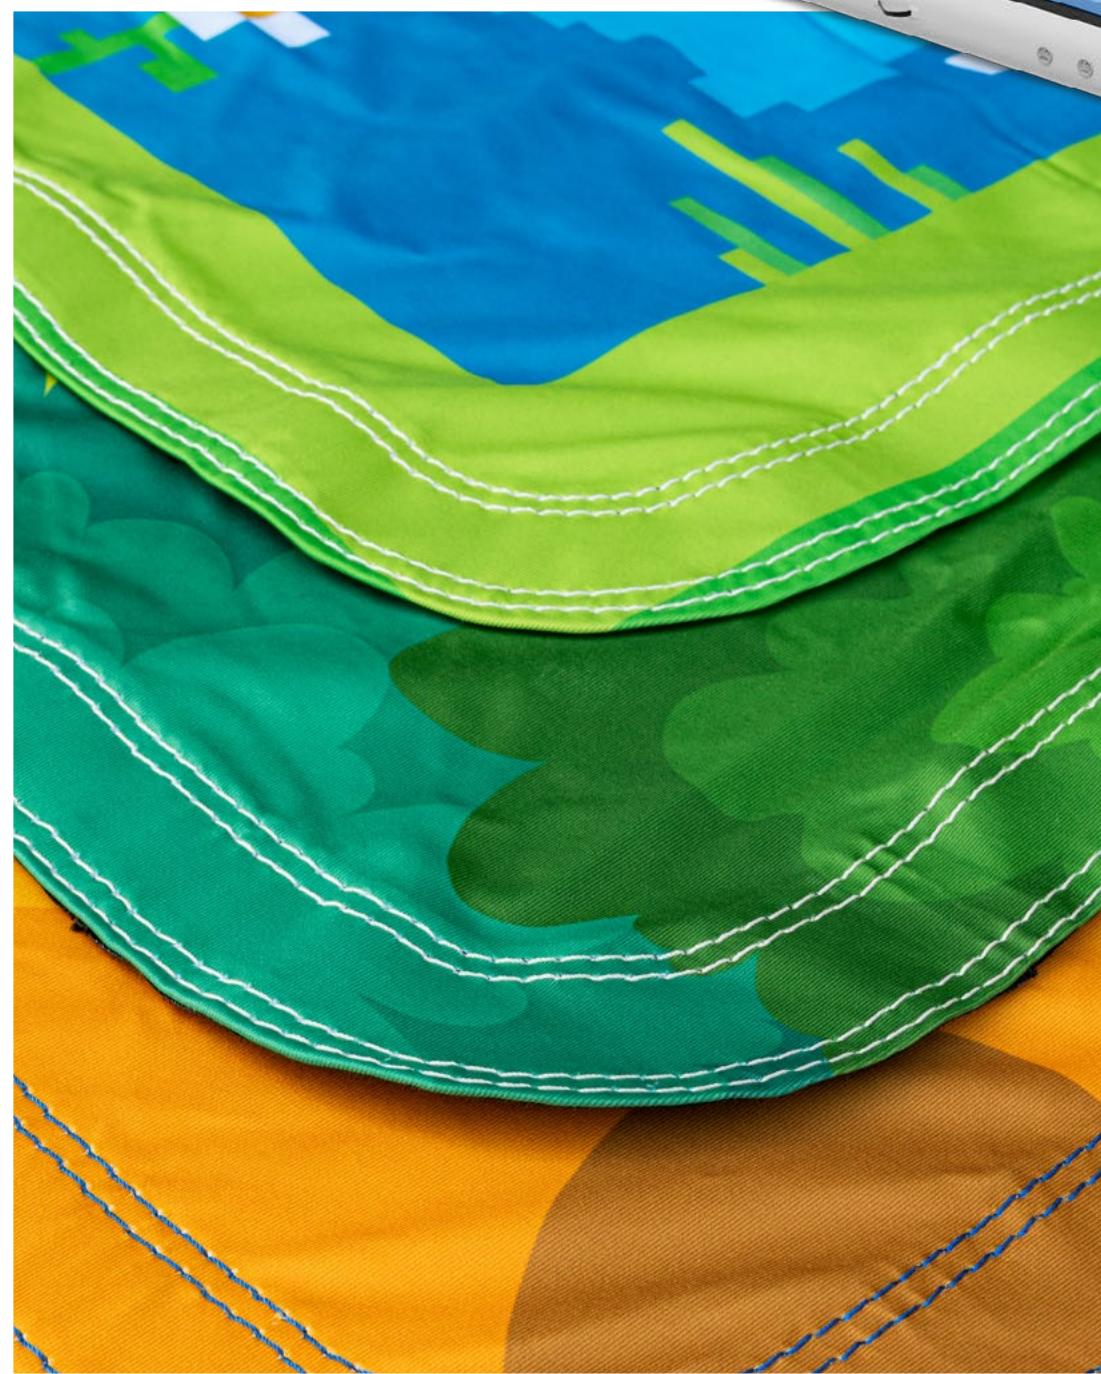

SIDE COLOR

If the sides are visible, you can use these to make the AirCourt pop or to add your logo's.

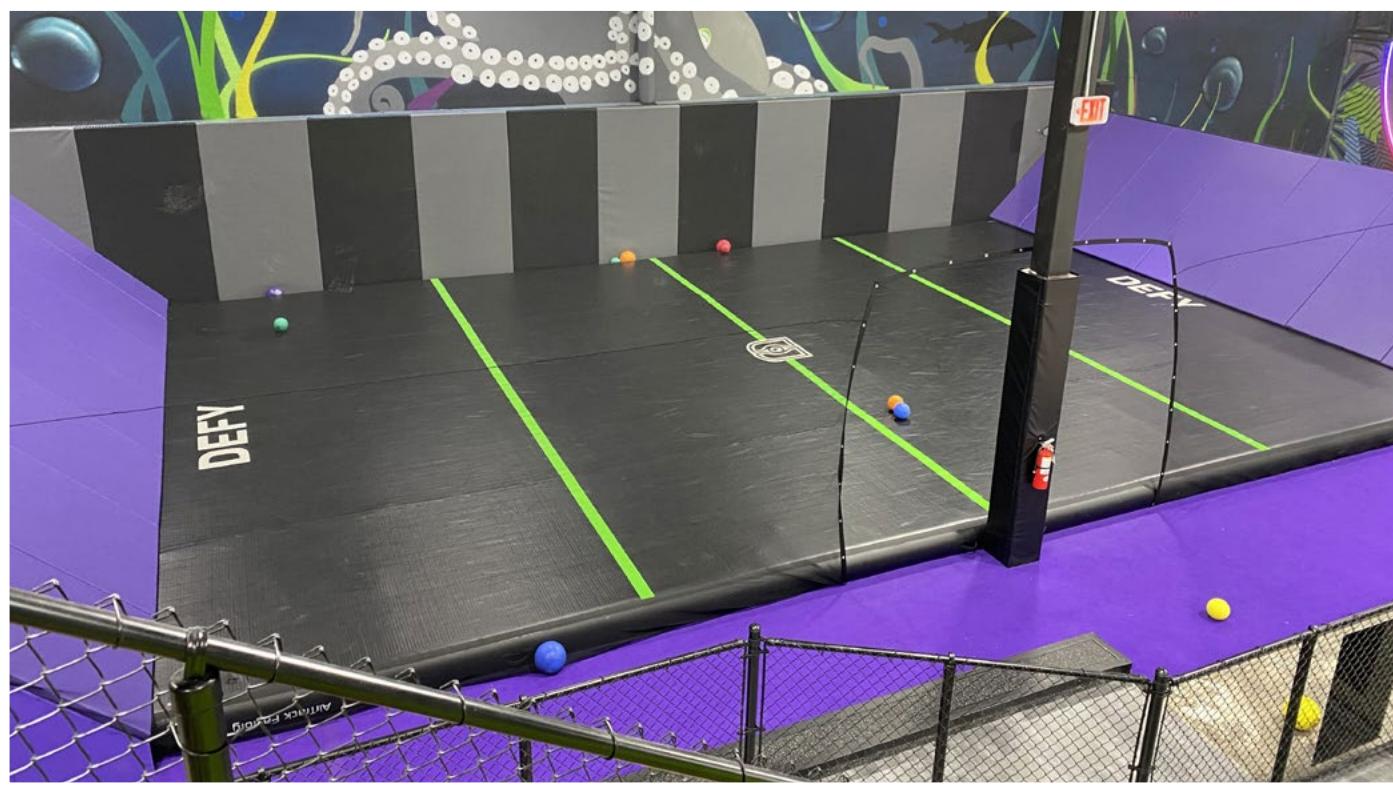

CUSTOM TOP SHEETS

Looking for something beyond a plain color scheme? Our full-color topsheet option lets you showcase your brand in stunning detail. With a custom topsheet, every element, from logos and court lines to vibrant designs, can be tailored to your vision.

The silky-smooth material is expertly stretched over the AirCourt for a sleek, professional finish. For the ultimate visual impact, the topsheet can even wrap around the sides, creating a seamless and immersive design that perfectly integrates into your facility.

SAFETY FIRST

At AirTrack Factory, we design the AirCourt to fit seamlessly into any environment, even existing cages or tight areas. Each installation features a precisely crafted flush safety zone that blends smoothly with the surroundings, providing a clean look and comfortable transitions all around. The result is a perfectly integrated, safe, and professional setup ready for action.

Our Bravo blower continuously measures and readjusts the pressure, to keep your facility running at all times.
